

Vape Rings: Shatterproof and Indestructible

VapeGuard's vape rings: Offer a dramatic leap of design from old vape bands and vape rings that slip and slide on and off tank glasses. VapeGuard offers the fragile 1mm glass, total shatterproof protection, from even the most severe damage.

VAPE GLASS PROTECTOR

Vape Rings: A Leap in Design and Technology

You love your vape ring, but accidents happen. Imagine the peace of mind with our Vape Rings Protector. This protector guards against drops and mishaps. The 360 shatterproof design keeps your vape looking brand new. Every vaper deserves this kind of security.

Indestructible Vape Rings

“Reports from customers say that they have accidentally dropped their vape from as high as 3 meters onto concrete, without a scratch”.

Vape Rings: Reviews

While this may seem remarkable, we therefore invite you to explore our reviews on Etsy to discover feedback from our customers. In light of this unique design, we applied for a patent and have therefore registered our name as a trademark.

VapeGuards Vape Rings features:

There are two VapeGuard model sizes, from 18mm that will stretch to 30mm, and the larger size that is 26mm that will even so stretch to 45mm. We sell 2 sizes with every order, to cover the full range of vape brands, and glass shapes. This is so customers don't have to guess what size VapeGuard is most suitable for their own specific vape tank.

Vape Rings Tank Protectors, using Medical Grade Silicon

Made of medical grade silicon rubber, therefore the benefit of this is that it shows greater elasticity without breaking. Lower grade silicon's have a tendency to break easily if stretched too far. The medical grade silicon also has more resistance to heat, and corrosive fluids such as vape oils. These have a longer life span, while retaining its position after being stretched. Lower grade silicon's tend to be too elastic and after time weaken and go slack.

VapeGuard's Vape Rings Design

VapeGuard has been designed in such a way to protect any vape glass from any kind of damage. Six thick fenders are placed around the circumference in such a way so the glass will never come into contact with

any surface. In between these fenders are vertical slits for the user to see the liquid level. The design works well on either straight glass, or bubble glass, the silicone shapes itself around the glass bulge to give complete 360 protection. The top and bottom rim of VapeGuard is much thicker, contoured inwards to the edge of the glass rim for a firmer grip.
